

Demonstration of Proposed Features

Date: 15 March 2026

Team ID: XXXXXX

Project Name: Human Development Index (HDI) Prediction using Machine Learning

Demonstration of Proposed Features

This document records the features proposed during the planning phase of the **Human Development Index (HDI) Prediction System** and confirms whether they were successfully implemented and demonstrated. It helps evaluate the completeness of the project and verifies that the proposed objectives were achieved.

Feature Demonstration Table

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	User Login	Secure login for users and administrators.	Implemented	Yes	Working successfully.
2	HDI Data Input	Allows users to enter Life Expectancy, Mean Years of Schooling, Expected Years of Schooling, and GNI per capita.	Implemented	Yes	Input validation completed.
3	HDI Prediction	Predicts the Human Development Index category using a Machine Learning model.	Implemented	Yes	Accurate predictions generated.

4	Interactive Dashboard	Displays prediction results using charts and graphs.	Implemented	Yes	Visual reports available.
5	Country Comparison	Compares HDI values and development indicators of multiple countries.	Implemented	Yes	Comparison module working correctly.
6	Report Generation	Generates downloadable prediction reports in PDF/CSV format.	Implemented	Yes	Reports downloaded successfully.

Feature Implementation Summary

Item	Value
Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%

Demonstration Summary

The **Human Development Index (HDI) Prediction System** successfully implements all the proposed features identified during the planning phase. Each feature was tested and demonstrated successfully, including user authentication, data input, machine learning-based HDI prediction, interactive dashboards, country comparison, and report generation. The system meets the planned objectives and provides a reliable, user-friendly platform for analyzing human development indicators and supporting data-driven decision-making.
