Team ID

XXXXX

Project Name

Human Development Index (HDI) Prediction using Machine Learning

Brainstorming

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Vanjarapu Ramalakshmi	Predict HDI category using Machine Learning algorithms	Machine Learning	1
2	Goli Devisriprasada	Build a web application where users enter country indicators and receive HDI predictions	Web Application	2
3	Kolajyothsna Bhavani	Visualize HDI trends using interactive charts and graphs	Data Visualization	3
4	Lavanya Goriparthi	Compare multiple countries based on HDI indicators	Comparative Analysis	3
5	Pravallika Mukkala	Provide policy recommendations based on predicted HDI results	Decision Support	4
6	Team	Deploy the model online for public use	Cloud Deployment	5

Validation

Group No.	Final Idea	Feasibility	Importance	Priority Selected
1	Develop an HDI Prediction Model using Machine Learning	High	High	Yes
2	Create a User-Friendly Prediction Web Application	High	High	Yes
3	Build Interactive HDI Data Visualization Dashboard	Medium	High	Yes
4	Generate Development Insights and Policy Recommendations	Medium	High	Yes
5	Deploy the Application on Cloud Platform	Medium	Medium	No

Final Selected Idea

Human Development Index (HDI) Prediction using Machine Learning

Reason for Selection

The project predicts the Human Development Index category (Very High, High, Medium, or Low) using key development indicators such as **Life Expectancy, Mean Years of Schooling, Expected Years of Schooling, and Gross National Income (GNI) per capita**. It helps governments, researchers, and policymakers assess a country's development level, identify improvement areas, and support evidence-based decision-making. The solution is practical, feasible to implement, and has significant social impact.
