Project Name

Human Development Index (HDI) Prediction using Machine Learning

Empathy Map

PERSONA

Name: Dr. Ravi Kumar

Role / User Type: Government Policy Analyst

SAYS

- "I need accurate data to evaluate my country's development."
 - "Which indicators have the greatest impact on HDI?"
 - "I want reliable predictions to support policy decisions."
-

THINKS

- "Healthcare, education, and income must improve together."
 - "Manual analysis of development data takes too much time."
 - "A predictive model can help make better planning decisions."
-

DOES

- Collects national development statistics.
 - Compares HDI values across different countries.
 - Uses reports and dashboards to recommend government policies.
-

FEELS

- Concerned about countries with low human development.
 - Motivated to improve citizens' quality of life.
 - Confident when supported by accurate machine learning predictions.
