

CUSTOMER JOURNEY MAP

Date: 15 July 2026

Team ID: XXXXXX

Project Name: Human Development Index (HDI) Prediction using Machine Learning

Phase of Journey	Stage 1 – Data Collection	Stage 2 – HDI Prediction	Stage 3 – Result Analysis & Decision Making
Actions <i>What does the customer do?</i>	• Collect country development data. • Enter Life Expectancy, Mean Years of Schooling, Expected Years of Schooling, and GNI per capita. • Upload or input the dataset.	• Click the Predict button. • Machine Learning model processes the data. • System predicts the HDI category.	• View HDI score and category. • Analyze strengths and weaknesses. • Use insights for policy and planning.
Touchpoint <i>What part of the service do they interact with?</i>	• Web Application • Input Form • Dataset Upload	• Prediction Engine • Machine Learning Model • Processing Dashboard	• Prediction Dashboard • Charts & Graphs • Download Report
Customer Thought <i>What is the customer thinking?</i>	• Is my data accurate? • Have I entered all required values? • Will the model provide reliable predictions?	• How is the prediction calculated? • Which indicators influence the HDI most? • Is the prediction accurate?	• What improvements are needed? • Which sector should receive more attention? • How can these insights support policy decisions?
Customer Feeling <i>What is the customer feeling?</i>	• Curious • Hopeful • Interested	• Excited • Confident • Expectant	• Satisfied • Informed • Motivated to improve development
Process Ownership <i>Who is in the lead on this?</i>	• Data Analyst • Research Team • User	• Machine Learning System • AI Model • Backend Server	• Government Officials • Policy Makers • Researchers

Opportunities <i>How can we improve this stage?</i>	• Automatic data validation. • Real-time dataset updates. • User-friendly input interface.	• Improve prediction accuracy. • Faster processing. • Explainable AI for transparency.	• Interactive dashboards. • Personalized recommendations. • Export reports in PDF/Excel formats.
